

AI-Powered Virtual Office

User Guide

1. Introduction

This document explains how to use the main features of the AI-powered Virtual Office web application.

The system is designed for three main roles:

- Admin: manages users, permissions, configuration and has the broadest access.
- Staff: regular employees who work on assigned tasks and participate in teams.
- User: basic account, usually an individual contributor with limited permissions.

The application includes:

- Dashboards tailored to each role.
- Task and project views.
- User and permission management.
- Campaign and email template management.
- Attendance and check-in tracking.
- Chat Box and Video Chat for communication.
- An AI Chat Bot to answer questions based on this guideline.
- Real-time notifications and personal profile settings.

Use this document as the “source of truth” for how features work. The AI Chat Bot uses this knowledge when answering questions, so keeping it accurate and clear is important.

2. Navigation Basics

2.1 Main layout

The application uses a simple layout:

- Left sidebar: navigation menu (Dashboard, Chat Box, app.video_chat, Team Progress, etc.).
- Top bar: language selector, notifications bell, and current user menu.
- Bottom-right: floating Chat Bot button.

2.2 Language switch

You can switch the interface language (for example English / Vietnamese):

1. Look at the top-right of the page.
2. Click the current language label (for example “English”).
3. Choose your preferred language from the dropdown.

The Chat Bot will also try to answer in the same language as the UI.

2.3 Opening the Chat Bot

1. Look at the bottom-right corner of any page.
2. Click the round Chat Bot icon.

3. A chat window opens with a greeting such as “Hi, how can I help you?”.
4. Type your question in the “Type a message...” box and press Enter or click the send button.

Example questions:

- “How do I see my assigned tasks?”
- “How can I request a day off?”
- “Where can I see team members?”

3. Roles and High-Level Capabilities

3.1 Admin

Admins typically can:

- View and manage all users in the system.
- Edit user roles and some permissions.
- See high-level dashboards such as Pending Tasks, Active Projects, Total Users.
- Access User Management, Permission Management, Campaigns, Email Templates, Working Hours, and other configuration screens.
- Export lists (such as users) to Excel.

3.2 Staff

Staff users typically can:

- See the Staff Dashboard with cards such as Your Upcoming Tasks, Request Day Off, and Team Overview.
- View and update the status of assigned tasks.
- Check recent activity related to their own work.
- Use Chat Box, Video Chat and the Chat Bot.

3.3 Regular User

Regular Users (or basic accounts) usually can:

- See their own Dashboard including Assigned Tasks and Team Members.
- Check in and check out for attendance.
- View limited statistics such as earnings, task completion percentage and pending requests.
- Use communication features and the Chat Bot.

4. Dashboard – Admin View

When you log in as an Admin and open the Dashboard, you will see several cards.

4.1 Top summary cards

Typical cards include:

- Pending Tasks: shows the number of tasks that are still pending.

- Active Projects: shows the number of projects currently active.
- Total Users: shows how many users are in the system.

4.2 User Management card

Purpose: manage team members and their roles.

To open User Management from the Dashboard:

1. Find the “User Management” card.
2. Click the expand icon in the top-right corner of the card OR click the “Add New User” button.
3. You will be taken to the User Management screen (see section 7).

4.3 Permission Management card

Purpose: organize staff permissions.

From the Dashboard:

1. Find the “Permission Management” card.
2. Click the expand icon or the “Edit Permissions” button.
3. You will be taken to a screen where you can view and adjust available permissions (depending on your implementation).

Other cards on the Admin Dashboard may include Task Management, Company Working Hours, Campaign

Management, Email Template Management, Recent Check-ins and Recent Activities.

The exact behavior

is similar to the detailed sections below: each card opens a full-page view when you click the expand icon or main button.

5. Dashboard – Staff View

When you log in as Staff, you will see a Dashboard adapted for staff responsibilities.

5.1 Your Upcoming Tasks

This card shows tasks assigned to the staff member, often in a table with:

- Task name.
- Due date.
- Status (for example Pending, In Progress, Completed).

You can usually click a “View Tasks” or similar button, or the expand icon, to open a full-screen view

of all your upcoming tasks.

5.2 View Request Day Off

This card lets staff see and manage their day-off requests.

You can:

- View existing requests and their status (Pending, Approved, Rejected).
- Open the request page to submit a new day-off request.

5.3 Team Overview

This card provides a high-level overview of the team: members, roles, and current workload. Clicking

“View Team” or the expand icon opens a screen where staff can see all team members and (depending on permissions) some summary of their tasks.

5.4 Recent Activity

At the bottom of the Staff Dashboard, a “Recent Activity” section may show a list of actions performed by the staff member or related to their tasks: for example tasks created, updated, or completed.

6. Dashboard – Regular User View

Regular Users see a simpler Dashboard focused on their own work.

6.1 Check attendance

The “Check attendance” card allows the user to check in and check out.

Typical flow:

1. Go to the Dashboard.
2. Find the “Check attendance” card.
3. Enter your username if requested.
4. Click “Check In” when you start work.
5. Click “Check Out” when you finish.

Working hours (for example 09:00–17:00) may be shown on the card.

6.2 Earnings and requests

Other cards may include:

- Earnings / month and Earnings / year: display salary or earnings indicators.
- Tasks: percentage of tasks completed.
- Pending requests: number of outstanding requests (such as day-off requests).

6.3 Team Members

A “Team Members” card lists other members in the same team or organization. If there are no other members, the card will state that no team members are assigned.

6.4 Assigned Tasks

The “Assigned Tasks” card displays tasks specifically assigned to the user. Clicking the expand icon will open a full-screen “Assigned Tasks” view, where the user can see task details and update statuses.

7. User Management (Admin)

7.1 Purpose

The User Management feature lets Admins view all users, create new users, update user information and roles, and delete accounts.

7.2 Opening User Management

From the Dashboard:

1. Locate the “User Management” card.
2. Click the expand icon OR the “Add New User” button.
3. You will be redirected to the User Management screen.

7.3 User Management screen overview

At the top of the screen you will find:

- A search bar: “Search by username or email”.
- A role filter: dropdown “All Roles” to filter by Admin, Staff or User.
- A sorting control: such as “A → Z” to sort by name.
- Filter and reset icons: advanced filtering and clearing filters.
- An “Export to Excel” button: export the user list to an Excel file.

The user table typically shows:

- ID – user ID.
- Full Name – display name.
- Email – login email address.
- Role – Admin, Staff, or User.

On the right side of each row there are action icons (view, edit, delete).

7.4 Viewing user details

1. In the desired row, click the “eye” icon.
2. A details view will open, showing more information about the user (for example full name, email, role, and other metadata depending on your implementation).

7.5 Editing user information

1. In the desired row, click the “edit” icon (usually a green pencil).
2. The “Update User” dialog appears with fields such as:
 - Full Name.

- Role (Admin / Staff / User).
3. Change the values as needed.
 4. Click “Update” to save, or “Cancel” to close without making changes.

Only Admins (or roles with specific permission) should be able to change another user’s role.

7.6 Creating a new user

You can create a new user in two ways.

Option 1 – from the Dashboard:

1. On the “User Management” card, click “Add New User”.

Option 2 – from the User Management page:

1. On the User Management screen, click the “+ Add Member” button in the top-right corner.

Then:

2. On the “Create New User” screen, fill in:
 - Full Name (required).
 - Email Address (required).
 - User Role (required) – select Admin, Staff or User.
3. Click “Create User” to save the new account.

7.7 Importing users from Excel

To create multiple users at once:

1. Go to the “Create New User / Import Users” screen.
2. On the “Import Users from Excel” panel, click “Download Template” to get the sample Excel file.
3. Fill the Excel file with user data using the required columns.
4. Click “Choose File” and select your filled Excel file.
5. Click “Import” to let the system create users based on the file.

7.8 Deleting a user

1. In the user table, find the account you want to remove.
 2. Click the red trash bin icon.
 3. Confirm the deletion if a confirmation dialog appears.
- The user will be removed from the list. If you only want to block access temporarily, consider using a deactivation or lock mechanism instead of deleting (if your system supports it).

8. Permission Management (Admin overview)

Permission Management lets Admins control what different roles are allowed to do.

Typical tasks include:

- Viewing all available permissions.
- Assigning permissions to roles (Admin, Staff, User).
- Optionally assigning special permissions to specific users.

From the Dashboard, open the “Permission Management” card and follow on-screen controls to view and edit permissions. The exact layout may vary, but the goal is always to control who can access which features.

9. Communication Features

9.1 Chat Box

Purpose: real-time text messaging inside the virtual office.

Open the Chat Box:

1. Click “Chat Box” in the left sidebar.
2. The Chat Box screen appears with existing conversations on the left and the selected chat on the right.

Start a one-to-one chat:

1. In Chat Box, click “New chat” or the plus icon (if available).
2. Search for the colleague by name or email.
3. Select the user to open a new conversation.
4. Type your message in the input box and send.

Create a group chat (if supported):

1. In Chat Box, click “New group” or “Create group chat”.
2. Enter a group name (for example “Marketing Team – October”).
3. Select members to add to the group.
4. Click “Create” and start chatting.

Send files or images:

1. In a chat, click the attachment or image icon below the input field.
2. Choose a file from your device.
3. Wait for the upload to finish and click send.

View chat history:

1. Open the conversation from the list.
2. Scroll up to see older messages.
3. If there is a search field, type a keyword to find specific messages.

9.2 Video Chat

Purpose: online meetings directly within the system.

Open Video Chat:

1. Click “app.video_chat” (or “Video Chat”) in the left sidebar.
2. You will see existing meeting rooms and a button to create a new meeting.

Create a new meeting room:

1. On the Video Chat page, click “Create Room” or “New Meeting”.
2. Optionally give the room a name (for example “Sprint Planning Week 42”).
3. Choose whether the room is open or restricted to invited users.
4. Click “Create / Start” to begin the call.

Join a meeting:

- From the Video Chat list: open the page, find the room and click “Join”.
- From a link: click the meeting link shared via Chat Box or email. The system opens the Video Chat page and joins the corresponding room.

In a meeting you can usually:

- Turn microphone on/off.
- Turn camera on/off.
- Share your screen.
- Use the in-meeting chat (if available).
- Leave the meeting when finished.

10. AI Chat Bot

10.1 Purpose

The Chat Bot is an AI assistant that helps users understand and use the system. It answers questions using this guideline and other internal knowledge.

10.2 What you can ask

Examples:

- “How do I view my assigned tasks?”
- “How can I request a day off?”
- “Where can I see team members?”
- “How do I add a new user as Admin?”
- “What is the difference between Admin and Staff?”

If the answer is not covered in the knowledge base, the bot will say that the topic is not documented.

10.3 Limitations

- The Chat Bot explains and guides; it does not directly change data (for example it does not create tasks or approve requests for you).
- Its answers are only as accurate as the underlying documentation.

11. Real-time Notifications

11.1 Purpose

Real-time notifications make sure users do not miss important events, such as:

- Being assigned a new task.
- Task status changes.
- Day-off requests being approved or rejected.
- Upcoming video meetings.
- Other system alerts defined by your application.

11.2 Viewing notifications

1. Look at the top-right of the screen.
2. Click the bell icon.
3. A dropdown appears showing recent notifications.
4. Click a notification to navigate to the corresponding page (for example Assigned Tasks or Request Day Off).

11.3 Behavior

- New notifications appear automatically without reloading the page.
- Unread counts are usually shown as a badge on the bell icon.
- Some events may also be recorded in separate history or activity logs.

12. User Profile and Account Settings

12.1 Purpose

The User Profile page allows you to manage your personal information, password, avatar and possibly other settings such as preferred language.

12.2 Opening your profile

1. Look at the top-right of the screen.
2. Click your username or avatar.
3. Select “Profile” or “User Profile” from the dropdown menu.

12.3 Editing profile information

1. On the User Profile page, click “Edit Profile”.
2. Update allowed fields such as full name or contact information.
3. Click “Save” to apply changes.

12.4 Changing your password

1. Open the User Profile page.
2. Find the “Change Password” section.
3. Enter your current password.
4. Enter and confirm your new password.
5. Click “Save / Update Password”. You will use the new password next time you log in.

12.5 Updating your avatar

1. On the User Profile page, click your current avatar or the “Change Avatar” button.
2. Select an image file from your device.
3. Confirm the upload.
4. The new avatar appears in the top bar and other places where your avatar is shown.

12.6 Privacy notes

- Basic profile information (name, avatar, role) may be visible to other users in features like Team Overview or Chat Box.
- Sensitive data such as passwords are never visible to other users.
- Admins may see some additional information to help maintain accounts, depending on company policy.

End of document.
